

# Snitsa skärmar / screens

---

Design Kjell Hammar

## Produktinformation

Snitsa-seriens skärmar finns i många olika utföranden. Frontskärmar erbjuds i tre olika tjocklekar. Två av dem finns med funktionslist för tillbehör som t.ex. pennlåda och fäste för monitor. Flexibla bordsskärmar för tillfällig avskärmning t.ex. vid touchdown-bord. Golvskärmar med rätvinklig design och god ljuddämpning. Alla har ett gemensamt mål – att dämpa den allmänna ljudnivån och skärma av.

## Teknisk information

För att dämpa både låg- & högfrekventa ljud tillverkas Snitsa-seriens skärmar av en hård kärna i MDF och mjuka ljuddämpare, t.ex. mineralull, i olika tjocklekar. Sedan kläs hela skärmen i valfritt tyg. Frontskärmar fästs med vinkelbeslag på bordsskivor. Flexibla bordsskärmar och golvskärmar står på stadiga metallfötter.

## Product information

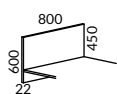

Snitsa screens are available in various designs. Front screens are offered in three different thicknesses. Two of them with function panel for accessories such as pencil box and monitor bracket. Flexible (none-fixed) desktop screens “to move around” e.g. for touchdown tables. Separation walls with rectangular design and sound attenuation. All screens have a common goal – noise reduction and divide areas.

## Technical information

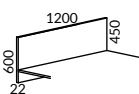

To reduce both low and high frequency sounds Snitsa screens are produced of a hard MDF and soft sound attenuations, e.g. mineral wool, of different thicknesses. The entire screen is upholstered in any fabric of your choice. Front screens are secured with brackets to table tops. Flexible table screens and separation walls stands on stable metal feet.
